

RUM Vitals

Real-Time Web Vitals Monitoring for Enterprise Success

Overview

RUM Vitals is an innovative monitoring solution that **captures website performance** data directly **from real, individual users**.

Our tool **delivers a complete and accurate picture** of how your website truly performs.

How It Works

1. **Simple Setup:** Integrate a lightweight **JavaScript snippet** into your website's footer.
2. **Real-Time Data Collection:** Monitor key Web Vital metrics in **real time**.
3. **Instant Impact Analysis:** See the immediate effects of updates you've made and **react swiftly** to performance challenges.

Key Features

- **Real-Time Monitoring:** flexible data ranges (5 minutes to 24 hours) with automatic updates every 5 minutes.
- **Intuitive Visualizations:** Clear, interactive graphs with hover details that break down performance into multiple segments.
- **Device & Page-Level Insights:** Easily filter data by device type and drill down to individual
- **Customizable Dashboard:** Configure custom column filters and page-type templates to match your business needs.
